FORM A2.
BRITISH RAINFALL.

-3 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Flodden, Milfield, Alnwick.

in the County of Northumberland,

by Charles Waterston.

Rain Gauge
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 9 in.
" " " Sea Level 200 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Station—Akeld, N.E.R.
Distance 3¾ Direction S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

Kept at Bardon Mill, Bellingham

in the County of Northumberland 2

by Rev H. C Newbery

RAIN GAUGE
- Pattern
- Diameter of top ______ in.
- Height of top above Ground ______ ft. ______ in.
- " " " Sea Level ______ ft.

Time of Observation

Nearest Railway Station
- Name
- Distance ______ Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
4 JAN 191

REGISTER OF RAINFALL IN 1910

Kept at Monks Holme, Corbridge
in the County of Northumberland
by Henry Palmer

RAIN GAUGE
Pattern Snowdon.
Diameter of top 5 in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 127 ft.

Time of Observation 9 am

Nearest Railway Station
Name Corbridge.
Distance 1 m Direction South

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2. BRITISH RAINFALL. 440

31 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Bellister Castle

in the County of Northumberland 2

by J. M. Clark Esq

Rain Gauge { Pattern
Diameter of top .... in.
Height of top above Ground .... ft. .... in.
" " " Sea Level .... ft.

Time of Observation

Nearest Railway Station { Name
Distance .... Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

5 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Beaufront Castle Hexham

in the County of Northumberland 3

by Capt. J. H. Cuthbert

RAIN GAUGE
Pattern copper cylinder
Diameter of top 8 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 400 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Hexham
Distance 3 Direction S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 340T ft.

Time of Observation 9 a m

Nearest Railway Station
Name Ilderton
Distance 3/4 mile Direction S. W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

This looks like a mistake as the monthly agrees with that of the kitchen garden

but there is one day which differs greatly from the kitchen garden, and in other months there is an agreement

Distance 3½ miles Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
4 JAN 1911

Kept at Cragside Rothbury
in the County of Northumberland
by W Bertram Cragside

5

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. 3 in.
" " " Sea Level 405 ft.

Time of Observation 9 A M

Nearest Railway Station
Name W Bertram
Distance mile Direction S W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
27 JAN 1910

Kept at Wallington Gardens

in the County of Northumberland

by Edward Keith.

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 2 ft. 9 in.
" " " Sea Level 446 ft.

Time of Observation 9 a.m

Nearest Railway Station
Name Scots Gap
Distance 1¼m. Direction N. E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A1. BRITISH RAINFALL.

18 JAN 1911

Kept at Doddington Vicarage

in the County of Northumberland. 6

by J. G. Shotton.

RAIN GAUGE
Pattern Ordinary
Diameter of top 8 in.
Height of top above Ground ft. 6 in.
" " " Sea Level 140 ft.

Time of Observation 9 am

Nearest Railway Station
Name Wooler
Distance 2½ miles Direction South W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.
